Mobile: [+919747692552](tel:+919747692552)

SKILLS

Languages:	C++, Python
Tools/Platforms:	MongoDB, Power BI, MS Excel, MS SQL Server
Soft Skills:	Problem-Solving, Team Player, Project Management, Adaptability

PROJECTS

Institution Management System GitHub	Jun' 26
- Designed and developed a dynamic, role-based Institution Management System enabling seamless coordination between students, faculty, and administrators with database-driven authentication. - Implemented student and faculty dashboards including features like assignment tracking, announcements, fee status, leave applications, and student-faculty interactions. - Created and deployed a web-based application using PHP and integrated HTML, ensuring an intuitive and visually appealing interface, resulting in a user satisfaction score of 90. <i>Tech: PHP, HTML, CSS, MySQL, XAMPP</i>	
Retail Sales Exploratory Data Analysis GitHub	Apr' 25
- Performed Exploratory Data Analysis (EDA) on retail sales datasets to uncover trends, seasonality patterns, and major business insights. - Analyzed product- and store-level performance to identify high- and low-performing categories and quantify sales drivers. - Evaluated the impact of promotions, discounts, and holidays on sales to support data-driven decision-making and forecasting. <i>Tech: Python, Pandas, Seaborn, Matplotlib</i>	
Dynamic CPU Scheduling Simulating System GitHub	Mar' 25
- Developed, designed and implemented an interactive web-based CPU scheduling simulator supporting classical algorithms such as FCFS, SJF, and Round Robin. - Integrated real-time Gantt chart visualizations for process execution timelines along with detailed performance and energy consumption metrics. - Added CSV import/export functionality allowing users to upload custom process data and download results for further analysis or documentation. <i>Tech: HTML, CSS, JavaScript</i>	

TRAINING

Fundamentals of Data Structures Lovely Professional University	Jun' 25 – Jul' 25
Data Structures and Algorithms using java	
- Applied algorithmic techniques such as divide-and-conquer, dynamic programming, and greedy paradigms to solve computational problems, with emphasis on Big-O optimization and performance benchmarking in Java. - Gained practical experience implementing data structures such as arrays, linked lists, stacks, queues, trees, graphs, and hash tables in Java.	

CERTIFICATES

Computational Theory: Language Principle & Finite Automata Theory Infosys	Sep' 25
Java Programing iamneo	May' 25
Object Oriented Programing using C++ iamneo	Dec' 24
Responsive Web Design Free Code Camp	Oct' 23

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 23 – Present
Computer Science and Engineering; CGPA: 6.5	
GHSS Thiruvalli	Thiruvalli, Kerala
Intermediate	Jun' 20 – Mar' 22
PCMB; Percentage: 85%	
Otten English School CBSE	Wandoor, Kerala
Matriculation	Jun' 08 – Mar' 20
Percentage: 74.2%
