PROFILE

Data Analyst and AI Engineer with hands-on experience in Python, SQL, Power BI, and LLM integration. Skilled in EDA, data wrangling, and building intelligent, AI-powered data tools. Passionate about transforming raw datasets into actionable insights and developing conversational AI solutions for non-technical users. Currently pursuing B.Tech in Computer Science at Lovely Professional University.

SKILLS

- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn, LangChain, PyTorch
- **AI/LLM Tools:** Groq API, OpenAI API, Llama 3, Prompt Engineering
- **Tools and Technology:** Power BI, MS Excel, Google Sheets, Canva
- **Data Analysis Skills:** EDA, Data Wrangling, Statistical Analysis, Feature Engineering, Data Cleaning
- **Tools/Platforms:** MySQL, PostgreSQL, ETL Pipelines
- **Soft Skills:** Adaptability, Team Player, Project Management

PROJECTS

- **AI Data Analyst – Conversational CSV Analysis Tool** March 2026
 - Developed an intelligent, conversational data analysis tool that automates EDA and cleaning of large CSV datasets (10,000+ rows) including customer and e-commerce data, reducing manual analysis time by ~60%.
 - Integrated the Llama 3 Large Language Model via Groq API to translate natural language user queries into executable Pandas Python code, enabling non-technical users to query data intuitively.
 - Engineered a secure execution pipeline that runs AI-generated Python code on the backend and translates computed outputs into clear, human-readable insights.
 - Implemented an automated data cleaning module to preprocess raw datasets across 5+ data sources, improving data accuracy by eliminating null values, duplicates, and formatting inconsistencies before downstream analysis.
- **SQL & BI Project – tech_layoffs-analysis Dashboard** January 2026
 - Developed a SQL & Power BI dashboard to analyze 1,000+ employee salary and demographic records, delivering 5+ KPI visualizations for trend identification
 - Used advanced SQL window functions to compute rankings, averages, and rolling totals efficiently
 - Transformed raw database records into actionable insights through 3+ interactive Power BI dashboards, enabling data-driven decision-making on workforce trends
- **Excel-Air Quality Analysis** January 2025
 - Developed an Excel-based Air Pollution Analysis Dashboard analyzing 2,000+ data points across 28 Indian states using cleaned and transformed environmental data
 - Leveraged Pivot Tables, Charts, and Slicers to analyze pollution trends across Indian states and cities.
 - Created interactive KPIs and visual insights for pollution distribution and hotspot identification

CERTIFICATES

- | | |
|---|------------|
| • Data Analytics and Visualization Job Simulation – Accenture Forage | March 2025 |
| • Basics of Microsoft Power BI – UniAthena & Cambridge International Qualifications | March 2025 |
| • SQL (Intermediate) – HackerRank | March 2025 |

EDUCATION

- | | |
|--|---|
| • Lovely Professional University
<i>Bachelor of Technology - Computer Science and Engineering;</i> | Punjab, India
Since August 2023 |
| • S.N.Vidhya Bhavan
<i>Intermediate</i> | Chentrappinni, kerala
June 2020 - March 2023 |
